

2023
FOUNTAIN COUNTY
DUST CONTROL

Great Lakes Chloride Inc. has agreed to coordinate with the Fountain County Highway Department to get property frontages graded and dragged before application.

The price is \$124.00 per 100 feet (18' wide) with a required 300 foot minimum.

All material furnished delivered, and applied to any road in the county as directed by the county highway department. All calcium chloride is certified LIQUIDOW™, a product of Oxychem. Origin point is Ludington, Michigan. LIQUIDOW™ meets or exceeds ASTM D98 and AASHTO M144 requirements for calcium chloride purity. ASTM classification for LIQUIDOW™ is Type L.

Please fill out a dust control agreement and return to the Fountain County Highway Department. Before any dust control product can be applied, a dust control Agreement must be signed. Agreements can be picked up at the Highway Department, Auditor's office or printed online.

Fountain County Dust Control Agreement

Application # _____

Name: _____

Address: _____

Phone: _____

Dust control for Fountain County gravel roads is made available from independent contractors in the form of calcium chloride. These contractors will coordinate with Fountain County Highway Department to have property frontages graded or dragged before treatment. It is the responsibility of each property owner to clearly flag each end of the application area prior to preparation work or dust control application.

Further, the Fountain County Highway Department will retain the right to maintain the road in any manner determined to be necessary and without prior notice. Property owners may fill potholes with material on road, but when grading is needed it will be done with machine graders; no hand work will be done at County expense.
